

Premium Plate®

a TF Warren Company

**Full service provider of
steel plate and processing**

Overview

Premium Plate is a carbon, alloy, and stainless plate service center that specializes in providing the highest quality prime mill certified steel plate at competitive prices. We offer many different steel plate grades for use in general construction and industrial applications.

As a leading plate processor, we are focused on providing plate services to oil and gas, power generation, pressure vessel, wind energy, construction, marine, transportation, and the tank industry.

Premium Plate is a one stop shop for blasting, priming, plasma cutting, beveling, and rolling all under one roof.

Using state of the art equipment ran by highly trained operators, we provide quality parts on time at a cost effective price.

All plates have 100% traceability, and mill certified test reports are available.
